AUSTRALIAN BATTERY RECYCLING INITIATIVE

## IMPLEMENTING NEW PACKING INSTRUCTIONS FOR ROAD TRANSPORT OF MIXED LOADS OF BATTERIES

### Australian Dangerous Goods Code 7.7

#### **About this Webinar**

The purpose of this webinar is to provide practical guidance on safe packing of mixed loads of batteries for road transport.

This four-hour webinar has been prepared by ABRI with input from the National Transport Commission and members of the Competent Authorities Panel to ensure that the information provided is consistent with the latest version of the ADG.

The Australian Dangerous Goods Code was updated to version 7.7 in July 2020 for implementation October 2020 with a 12-month transition period to follow.

#### **Who should attend?**

This webinar will be relevant to those who are:

- Responsible for storage, packing or transport by road of mixed loads of batteries
- Interested in safe storage of batteries

#### **Cost**

\$95 +GST for non-members  
\$75 +GST for ABRI members

A certificate of attendance will be provided following the webinar.

#### **Topics**

The webinar will cover road transport compliance and best practice guidance including topics such as:

- General safety
- Choosing a qualified recycler
- Acceptable containers
- Packing instructions
- Placarding
- Transport and waste approval documentation
- Managed damaged and defective batteries
- This to avoid

#### **Presenters**

The webinar will be presented by ABRI's Libby Chaplin and Debra Kirk from the National Transport Commission.

#### **Optional Dates**

The webinar will be delivered on 5<sup>th</sup> and 9<sup>th</sup> November.

#### **Times**

10:00am – 12:30pm (AEDT)

#### **Registration**

- To register email [rsvp@batteryrecycling.org.au](mailto:rsvp@batteryrecycling.org.au)
- Upon receipt we will issue a registration link for payment
- Login details will be provided closer to the event.
