

# our company

Established in 1983, Innovative Mechatronics Group (IM Group) is the market leader and has earned a highly respected reputation in the aftermarket automotive industry for quality and innovation with exceptional service and quality products. IM Group became part of the GUD Holdings Limited in June 2017, complementing our offering to the wider GUD automotive and water businesses. Our dedication to providing superior quality products is highlighted by gaining ISO 9001:2008 accreditation. Recognised with many awards from the industry, IM Group was inducted into the Manufacturing Hall of Fame.

IM Group has world-class technical capabilities & facilities with extensive in-house R&D, for designing, testing, validating, and developing new products. Specialising in automotive electronics and mechatronics coupled with stringent processes, systems, and analyses.

The core values that drive IM Group are our strategic international sourcing focus with a research & development mindset and our passion for designing and developing innovative mechatronics products, test equipment, and exceptional services.
