

Association for the Battery Recycling Industry (ABRI)

VISION

Driving innovation and investment to foster a safe, sustainable and world leading battery recycling industry generating feedstock for new products.

ABOUT ABRI

ABRI is an Australian organisation representing companies across the battery value chain supporting a battery circular economy.

ABRI's work promotes safe and sustainable recycling of all battery chemistries at end of life through:

- Industry leadership including research and policy advocacy
- Industry best practice including promoting stewardship and social licence, education on safe transport of batteries to promote safe
- Sharing our market knowledge and networks to support improved information and awareness about battery recycling priorities

ABRI members represent all aspects of the battery supply chain. State and local governments, research bodies, energy companies and electronic goods manufacturers are also part of ABRI.

BENEFITS OF ABRI MEMBERSHIP

As the peak body, ABRI is the focal point for issues affecting the battery recycling industry and provides members with a voice on matters that drive a battery circular economy and industry best practice.

Benefits:

- Brand exposure. In March quarter 2023, there were over 1,500 visits to ABRI's website to find companies providing battery recycling services
- Workshops – Presentations and policy discussions from leading industry players and research institutions
- ABRI conference – discounted member tickets
- Policy and advocacy – working with governments on win-win policy and regulatory outcomes to support industry best practice and a circular economy
- Networking opportunities
- News and information – member bulletins on regulatory and other events, general bulletins on the latest industry news and research
- Collaboration with Battery Stewardship Council and the Australian Battery Industry Association on industry issues
- Training and education
