Dear Katharine

As you know, BSC has commissioned an economic evaluation of the Scheme. To augment this work, BSC is seeking to obtain a broader view of the economics of battery collection and recycling. Given ABRI's role as the industry representative, BSC would like to invite ABRI to provide a submission on the transport costs per kg for batteries in regional and metro areas, the cost of sorting and cost benefit of processing.

If it would be helpful, I would be happy to arrange a time for you to meet with the consultants.

We would appreciate your response by July 15th.

Best regards,

Libby
